

CONTRAST

01

L&D

We design light, one of the basic needs of our life cycle, for the universe and humanity in the most favourable form of life, and offer solutions that are "not just lighting" but "beyond lighting".

02

About us

Contrast LD , with its team of specialised staff, has many years of experience in the lighting industry, has produced international solutions and specialised in its field; our goal is to provide a full service from concept to specification, supply, integration, programming and system commissioning, by producing creative, accurate lighting solutions over the years with our partners, offering lighting luminaires and complete control solutions. Our strength lies in the depth of our technical expertise, which enables us to provide aesthetic, practical and sustainable solutions to the most complex challenges for our customers in various markets.

03

Services

LIGHTING DESIGN AND PROJECTING

Project requests from our customers are firstly evaluated by considering the type of the project, lighting needs and the characteristics of the space. The product groups to be selected are considered with the architectural structure and the project design is started. With the selected products, the lighting design, calculations and project placements of the space are made and presented.

SALES

In the project design phase, product selections are made by determining the physical structure, intended use, functionality and lighting needs of the space. Efficiency, energy saving, ease of installation/maintenance and long life of the products are evaluated.

LIGHTING CONSULTANCY

Our company supports you in lighting design, concept creation, design, product selection, project layouts, calculations and follow-up of the process in your projects.

04

Services

PRODUCT SPECIFICATION

The products that meet the desired technical and budgetary conditions specific to the project are examined and the most suitable product is selected and specialised.

CUSTOM LUMINAIRE DESIGN

Considering the architectural features and construction purposes of the projects, special product needs arise for the purpose of the space outside the standards, increasing the visuality and making the area the focal point. Our company easily serves these needs of our customers thanks to its wide product range and our manufacturer partners.

COMMISSIONING AND AUTOMATION

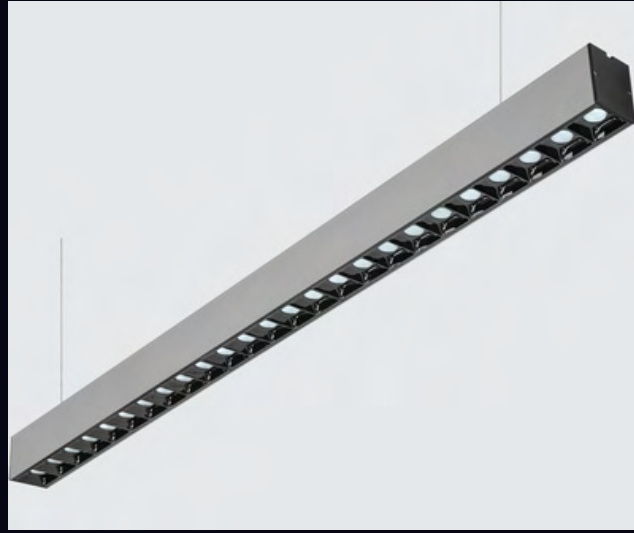

In line with the demands of our customers, if there are automation needs in our projects, our company also supports you in determining, projecting and supplying the needs of the projects. we also offer you products that will enable the products to work in coordination with the software.

Our philosophy

"NOT JUST LIGHTING" BUT "BEYOND
LIGHTING"
